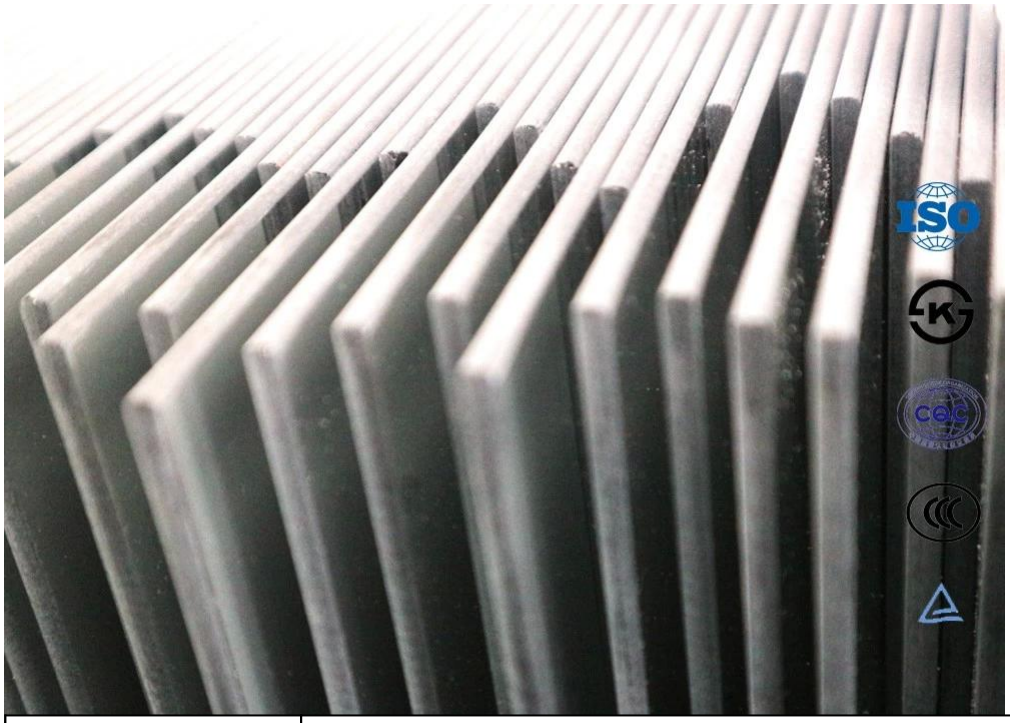
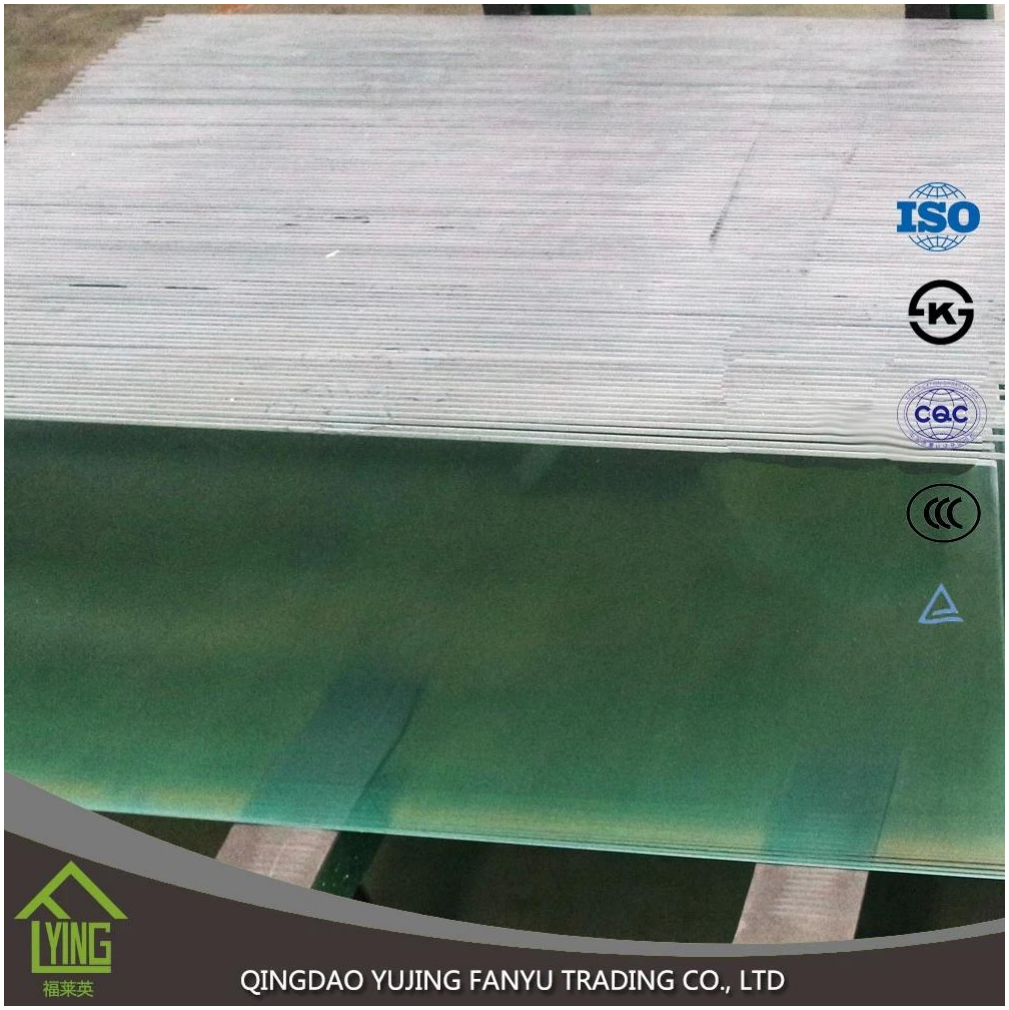
Yujing SAFETY GLASS is made by heating flat glass to just below its softening temperature (650 °c) and suddenly chilling it with jets of cold air. It results in the outer skins under powerful compressive stress and the interior with severe tensile stress. In consequence, the impact applied to the glass will be overcome by the compressive stress on the surfaces to assure safety of use. It is ideal for areas with high wind loads and areas where human safety is an important consideration.



Material	Jinjing Float glass
Sizes	2440*3300mm for max, or custom if needed
Available Thickness	5mm
Shape	Circle, rectangle, oval, square, or customed.
Glass Color	Clear, Extra clear
Edgeworks	Round edge/ Pencil edge/ C-edge; Flat edge/Beveled edge, etc.
Application	further processing, construction processing
Certificates	CE, CCC, etc.
Packing	Seaworthy wooden crates with Iron belt for consolidation
Delivery	Shipped within 25 days after deposit paid from Qingdao/Tianjin Port

Features

1. 5 times harder than ordinary float glass, stronger resistance to thermal breakage than annealed or heat strengthened glass.
2. Once breakage occurs, the glass disintegrates into small cubical fragments, which are relatively harmless to human body.
3. It withstands abrupt temperature change of 220 Centigrade.
4. Sizes are produced as per customer request. Once tempered, it can not be cut down.



Advantages

1. 10 years experiences on glass and mirror manufacturing and exporting.
2. Top quality glass with CE certificate, exporting to more than 80 countries in the world.
3. Unique designed strong wooden cases, solving the problems of breakage.
4. Full range of flat glass supply, offering one-stop purchase.
5. Professional sales team, offering personalized and dedicated services.
