

China 6mm 8mm 10mm tempered glass laminated glass

Clear laminated glass specification :

Clear laminated glass is one kind of safety glass made under high temperature by interlayering PVB membrane between glasses. It can be two sheets or more than two sheets. The film and tough bindings between PVB film and the glass create laminated glass for safe glass with excellent performance, durability or meeting standard. It can meet the external impact and pressure penetration. Once broken, the broken glass will still stick with the middle coatings so as to avoid human injury or property loss because of glass falling. Moreover, the whole glass still keeps its integrity and can continue to resist impact and provide a shelter from wind and rain.
