

**clear laminated glass safety building glass in China**

**Clear laminated glass specification :**

Clear laminated glass is one kind of safety glass made under high temperature by interlayering PVB interlayer between glasses. It can be less sheets or more than two sheets. The firm and tough bondings between PVB films and the glass makes laminated glass the safe glass with excellent performance. Vertically or obliquely installed, it can resist the external impact and prevent penetration. Once broken, the broken pieces will still be stuck with the middle coatings so as to avoid human injury or property loss because of glass falling. Moreover, the whole glass still keeps its integrity and can continue to resist impact and provide a shelter from wind and rain.
