

High quality clear float glass and modern mirror equipment combine to produce nice feeling mirrors of exceptionally high quality. Silver mirror is produced through a trine processing work by coating a silver film, a copper film, and two layers of waterproof paints on the surface of glass. Lead-free and copper-free silver mirror is one kind environmental mirror. It is produced with JINJING top quality clear float glass and two layers of light grey, green or other colors of Italy FENZI paint. It is usually used by IKEA, Europe, USA, etc.
