

Yujing TINTED GLASS is produced by the float process with the addition of small quantities of metal oxides to color the normal clear glass mix. This coloration is achieved through adding metal oxides at the smelting stage. Addition of color does not affect the basic properties of the glass, even though visible light reflectance will be slightly higher than clear glass.

FEATURES:

1. The tinted float glass can reduce transmission of the sun's harmful rays by up to 80%, thus minimizing fading to interior furnishings.
2. Tinted float glass can be bent, tempered or heat strengthened and in addition can be silk-screened or enameled.
3. The comprehensive range of soft natural colors compliments and harmonizes

with modern building materials to provide an exciting and different look to new or existing buildings.

Competitive Advantages:

1. 10 years experiences on glass manufacturing and exporting.
2. Top quality glass with CE certificate, exporting to more 80 countries in the world.
3. Unique designed strong wooden cases, solving the problems of breakage.
4. Full range of flat glass supply, offering one-stop purchase.
5. Professional sales team, offering personalized and dedicated services.
