

custom size safety glass tempered glass laminated glass manufacturer in China

Clear laminated glass specification :

Clear laminated glass is one kind of safety glass made under high temperature by interlayering PVB membrane between glass. It can be two sheets or more than two sheets. The heat and high pressure between the glass and the glass makes laminated glass for safe glass with excellent performance, stability or stability feature. It can meet the external impact and prevent penetration. Once broken, the broken pieces will still be stuck with the middle coating so as to avoid further injury or property loss because of glass falling. However, the whole glass still keeps its integrity and can continue to resist impact and provide a shelter from wind and etc.

Property :

- Extremely high safety. The PVB interlayer withstand penetration from impact.
- Energy absorbing capability. The PVB interlayer absorbs the maximum amount of heat and reduces cooling load.
- Crack-jamming while in building. Laminated glass with a colored interlayer will beautify the building and harmonize their appearance with surrounding view which meet the demand of architecture.
- Sound control. PVB interlayer is an effective absorber of sound.
- Ultra-violet screening. The interlayer filters out ultra-violet rays and prevents the furniture and curblins for fading effect.
